Section 1. Letter of Invitation

Mumbai

Date: July 7th, 2016

1. Introduction

The Government of India (GoI) has proposed the development of a Dedicated Freight Corridor (DFC) between Delhi and Mumbai covering a total length of 1483 km and is passing through six states of India. The corridor is envisaged to influence the pattern of development and industrialization of the region. To tap the development potential of the proposed freight corridor, a band spanning 150 kilometers wide on both sides of the freight corridor has been identified as Influence Region and is proposed to be developed as Delhi-Mumbai Industrial Corridor (DMIC).

GoI has recently come up with a national Programme, “Make-In-India” to promote manufacturing sector in a comprehensive manner. The program aims to facilitate investment, foster innovation, enhance skill development, protect intellectual property, and build best-in-class manufacturing infrastructure. On the other hand, contribution of manufacturing sector to overall GDP in India is still lower as compared to that of fast developing economies in the region like Thailand, China, Indonesia and Malaysia.

Thus, what is seen is that at the national level, there is clearly an opportunity to steer industrial corridor development in a collective & coordinated fashion.

At the state level in Maharashtra, of the seven nodes to be developed as a part of the DMIC corridor, the Nasik Sinnar Igatpuri Investment Region (NSIIR) in Maharashtra comprises of the Shendra–Bidkin Industrial Area. The development of this area is being carried out through Aurangabad Industrial Township Limited (AITL) a special purpose vehicle (SPV) between the Maharashtra Industrial Development Corporation (MIDC) and the DMIC Trust.

Aurangabad has significant potential for growth in various manufacturing sectors. The Aurangabad District is already an established location for automobile and automobile-related manufacturing. Aurangabad will be the showcase for Maharashtra’s strengths in manufacturing and technology— automobiles, textiles, apparel, consumer durables, and green industry. It will be the next sought after trade city, venue for manufacturing-related research and design, and high-tech hub centrally located within the state. The strategic location of the Shendra-Bidkin Industrial Area places it at the convergence of Maharashtra’s production, manufacturing, and tourism (historic sites). The industrial area also has the potential to become a niche for meetings, incentives, conventions, and exhibitions. It is expected to be well connected by roads, rail, and air and will have good connectivity to the ports.

The Shendra-Bidkin Industrial Area will spur demand for a wide array of spin-off businesses and will offer the full array of services required for a mega-scale industrial park and the communities located within it. As such, the Shendra-Bidkin Industrial Area is expected to generate huge employment and to add value and exports to the Aurangabad District and Maharashtra as a whole.

The broad vision for the Shendra-Bidkin Industrial Area is to become a ‘showcase of Maharashtra’s leading manufacturing industries’ with the following principles:

- Integrate smart growth within a new sustainable township.
- Identify high-value manufactured products with high export potential.

Selection of Consultant for Preparation of Detailed Master Plan and Design Guidelines for Infrastructure Implementation of AURIC - Bidkin Industrial Area under the Aurangabad Industrial Township Limited (AITL)

- Maintain a unique cultural heritage.
- Provide a healthy quality of life.

The Bidkin Industrial Area (BIA) is approximately 32 square kilometers in size. Envisaged as an integrated industrial development, the BIA is expected to have over 1400 ha of land allocated for industrial use, over 600 ha for residential uses with land allocation for allied commercial, amenity and infrastructure facilities.

A conceptual master plan for BIA has been prepared based on a detailed market demand assessment. The master plan identifies all key land uses, ROWs for transportation and infrastructure, including lands for amenities and open space.

Preliminary design for all infrastructure services viz. Water supply, Waste water, Storm drainage network, Power and ICT network for this master plan is being prepared.

The detailed scope of services to be provided for preparation of detailed master planning and design guidelines based on the conceptual master plan and preliminary infrastructure design is provided in the Terms of Reference.
